Suwon, Republic of Korea

MS–PhD Student · Efficient & Intelligent Computing Lab, Sungkyunkwan University

RESEARCH INTERESTS

Efficient AI for multimodal and generative models — vision token pruning for vision-language models, and flow-based text-to-image generation. Current research: modifying the initial noise of flow models to enhance image quality.

EDUCATION

Sungkyunkwan University

MS–PhD Combined Program, Department of Electrical and Computer Engineering · Advisor: Prof. Yulhwa Kim

PUBLICATIONS

ERASE: Eliminating Redundant Visual Tokens via Adaptive Two-Stage Token Pruning
